Volodymyr Shtyka

Experienced PHP Developer | Laravel Specialist | Innovative Project Leader

vladimirshtyka@gmail.com   +44 7856 259087   Weston-Super-Mare, BS22 8HQ   LinkedIn

Experienced, detail-oriented, and results-driven PHP Developer with over five years of dedicated experience in web development, specialising in PHP and Laravel. Adept at collaborating with development teams, ensuring seamless scalability and optimal performance. Excels in designing and optimising MySQL databases to support expanding user bases and utilises Git for version control and codebase management. Passionate about contributing to innovative projects, such as website relaunches and CRM rollouts, to enhance user experiences. Demonstrates a collaborative approach, showcasing adaptability and technical prowess. With a proven track record of delivering high-quality, well-tested code, is poised to bring skills to a dynamic PHP development role that values innovation, teamwork, and a commitment to excellence.

Areas of Expertise

- PHP
- Laravel
- Apache
- MySQL Optimisation
- Git
- JavaScript

- MVC Architecture
- Yii2 Framework
- Bitrix Framework
- Web Development
- Nginx
- ReactJS

- NodeJS
- Web Services
- WebSocket
- RESTful Services
- Object-Oriented PHP
- Design Patterns

Selected Accomplishments

- Pioneered language expansion for slotegrator.pro, significantly increasing global reach and enhancing user accessibility.
- Acknowledged for the successful development and launch of talentgrator.com and client.slotegrator.pro, showcasing excellence in project execution.
- Achieved efficient lead data management through the implementation of Excel file import for mass registrations, improving data accuracy and workflow.
- Contributed significantly to the development of Yoltik, a virtual reality software, by creating an intuitive website and web interface using Bitrix and Yii2 frameworks.
- Developed alarms for SAS SCR2 Alarm System, demonstrating proficiency in AngularJS, Yii2, and PostgreSQL.

Career Summary

PHP Developer, BolderSoft (contract)   **July 2024 - September 2024**

- Contributed to the development of JamGolf, a leading UK supplier of golf products, by implementing features for displaying products with sale prices and creating modals for action confirmation when adding product to invoice.
- Worked on tasks related to the admin and manager interface for Rossgower, an island specialist insurance broker, focusing on blocking the merging of similar customers and conducting PHP unit testing.
- Completed tasks for the Sycal-OMS admin and manager interface, utilizing Laravel and jQuery, and integrated Algolia search to prevent duplicate products. Generated login tokens for customer autologin via link, enhancing user experience and accessibility.
- Collaborated in an Agile team environment using Jira, with projects running in Docker containers for efficient development.

Accomplishments:

- Successfully improved the user experience for JamGolf by implementing critical e-commerce features.
- Enhanced data management processes for Rossgower through effective task execution.
- Streamlined product management for Sycal by integrating advanced search capabilities, reducing duplicate entries.

PHP Developer, Slotegrator   **August 2020 - August 2022**

- Developed and optimised website performance using Laravel and Yii2 frameworks, significantly improving loading speed and enhancing user experience.
- Spearheaded the creation and successful launch of talentgrator.com, a multilingual job search site, utilising Laravel framework and frontend technologies.
- Established client.slotegrator.pro, a secure service for storing provider and game information, employing Laravel framework and enhancing data management processes.
- Led the modernisation efforts of slotegrator.pro using Yii2 framework, introducing enhanced functionality and implementing SEO improvements.
- Collaborated on updating website designs for slotegrator.pro, ensuring a contemporary and user-friendly interface, positively impacting user engagement.

Accomplishments:

- Spearheaded a comprehensive modernisation effort for slotegrator.pro, elevating design, content, and functionality to drive improved user engagement.

- Innovatively developed talentgrator.com from inception, introducing cutting-edge multilingual capabilities and pioneering job search functionalities.
- Established client.slotegrator.pro as a holistic service platform, implementing user roles, access rights, and streamlined data management features for enhanced client interactions.
- Received acclaim for enhancing slotegrator.pro's design, content, and functionality.

PHP Developer, Leadsgenuine   **October 2018 - August 2020**
- Spearheaded the development of high-converting landing pages, optimising for both JS and PHP, resulting in a streamlined user experience and increased engagement metrics.
- Demonstrated proficiency in API integration by efficiently setting up various landing pages, ensuring seamless connections with multiple partners and enhancing data flow for improved lead generation.
- Innovatively designed and implemented a user data display system for partners, fostering stronger collaborations and providing comprehensive insights into registered users.
- Implemented a system for importing lead data through Excel files, achieving efficient mass registrations and contributing to the seamless management of user information for enhanced business intelligence.

Accomplishments:
- Spearheaded the implementation of HTML layouts for numerous landing pages, optimising for both JS and PHP, ensuring a consistent and visually effective design.
- Integrated feedback forms to work seamlessly with various partners' APIs, improving data flow and user engagement.
- Implemented features to showcase partner-specific data for registered users, enhancing partnerships and collaboration.

PHP Developer, Devkeeper   **June 2017 - March 2020**
- Showcased technical expertise by implementing new functionality for Raduga2 using JavaScript, elevating data processing capabilities and contributing to project success.
- Actively engaged in innovative projects, highlighting adaptability and excellence in project management and execution.
- Developed a user-friendly web interface for Yoltik and Raduga2 projects, utilising Bitrix and Yii2 frameworks.
- Worked on the integration of AngularJS for the frontend and Yii2 framework for the backend of the SAS SCR2 Alarm System, enhancing its functionality and performance

Accomplishments:
- Significantly contributed to engineering software design and development using diverse frameworks and technologies.
- Key role in developing Raduga2 Spectrometric Analyser, showcasing versatile programming and project management skills.

Qualifications

- **Front-End Web Development**, edX Skills Bootcamp, November 2023 – March 2024
- **CEFR B2 in the EnglishScore Core Skills** test, British Counsil, August 2024
- **British Council English Online course**, British Counsil, May 2024 - July 2024
- **English – ESOL Level 1 Functional Skills courses**, Weston College, September 2023 – June 2024
- **English – ESOL Entry 3 Functional Skills courses**, Weston College, April 2023 - June 2023
- **Fundamentals of digital marketing**, Skillshop – Google training platform, July 2023 - August 2023
- **Living and Working in the UK**, Weston College, January 2023 - June 2023
